We combine compassion
and support with
innovative technology
to aim for the best
possible outcomes.

AHN doctors and clinical specialists work in multidisciplinary teams to provide personalized, comprehensive care for each patient, close to home. We offer access to clinical trials and the newest therapies.

CANCER INSTITUTE

We treat many types of cancer with the latest advancements in surgery, radiation, chemotherapy, biologic therapy, immunotherapy, genomics, and pathology testing. We continue to adopt new technologies to improve results.

- Patient navigators help coordinate care in over 20 hospital and community locations.
- The newly opened AHN Cancer Institute — Allegheny General is the nucleus for research, clinical trials, treatment, and medical education.
- We collaborate with Johns Hopkins Sidney Kimmel Cancer Center to give streamlined and guided access to clinical trials and second opinions.

CARDIOVASCULAR INSTITUTE

We keep hearts beating using multimodality imaging and treatment with new medicines, advanced hybrid procedures, and implantable devices to fight heart, thoracic, and vascular disease.

- AHN has the best heart transplant survival rates in the region.*
- Robotic and minimally invasive surgery can reduce risk and speed recovery after coronary artery, aortic, vascular, and cardiac valve repair and replacement.

EMERGENCY MEDICINE

We offer critical 24/7 access to highly skilled emergency care and trauma specialists, coordinating EMS and emergency transport through our Prehospital Care Service team.

- LifeFlight helicopters from five regional locations provide lifesaving care and fast patient transport.
- Comprehensive stroke centers, certified by the American Heart and American Stroke Associations for safety and quality, offer rapid response time and innovative treatments.

MEDICINE INSTITUTE

Treatments for a wide range of conditions, including allergies, lupus, diabetes, Lyme disease, as well as digestive, dental, and skin conditions, breathing and sleep disorders, and more.

- At the AHN Autoimmunity Institute, a one-of-a-kind facility, multidisciplinary teams create and coordinate specialized care plans for patients with autoimmune disorders.
- Our interventional endoscopy team performs groundbreaking innovative procedures such as endoscopic stricturotomy — leading the region and the country.

NEUROSCIENCE INSTITUTE

We are an accredited, national leader in providing advanced therapies, proven technologies, and innovative procedures to help patients with complex brain, spine, and neurological conditions.

- We use a patient-centered, multidisciplinary approach to diagnose and treat neurologic disorders.
- Groundbreaking minimally invasive and robotic-assisted procedures help us enhance patient safety and lower risk.

ORTHOPAEDIC INSTITUTE

Our high-quality specialized care for orthopaedic injuries and complex musculoskeletal conditions help patients regain mobility and health.

- For joint replacement, we use muscle-sparing, minimally invasive, robotic-assisted surgery with advanced pain management.
- New therapies for comprehensive, coordinated concussion care offer patients focused treatment plans so they can get back to everyday activities.
- Elite sports medicine specialists help athletes overcome injuries and return to the game.

PEDIATRIC INSTITUTE

We provide expert pediatric care, close to home — for children from birth to age 21 — through the AHN Pediatric Alliance physician group and other providers. The Pediatric Institute offers:

- Well child exams, immunizations, and same-day sick visits.
- Treatment for chronic conditions like allergies, asthma, and ADHD.
- Specialized pediatric care for mental health, orthopaedic conditions, and immune system issues.

PRIMARY CARE INSTITUTE

More than 300 AHN primary care physicians across 120 locations provide coordinated, preventive care and condition management.

- Same-day appointments, video visits, and online scheduling improve access to care.

PSYCHIATRY AND BEHAVIORAL HEALTH INSTITUTE

We help patients regain control of their mental health through a customized plan of care, assessment, therapy, and/or medication.

- Deep transcranial magnetic stimulation (TMS) helps individuals with hard-to-treat depression for whom traditional therapies and medications have not been effective.
- AHN Women's Behavioral Health provides an intensive outpatient mother-baby program to manage perinatal mood and anxiety symptoms.

SURGERY INSTITUTE

Through the latest laparoscopic and robotic technologies, more patients have minimally invasive options for surgery, which may give them a faster recovery, less pain, and shorter hospital stay.

- Innovative surgical techniques help patients with complex hernias.
- AHN is the only system in the region offering combined colorectal and liver surgeries using the da Vinci Surgical System.

WOMEN'S INSTITUTE

We care for women throughout their lives with obstetrics, midwifery, four NICUs, primary care, breast care, midlife care, advanced gynecologic surgery, pelvic health, bone density testing, and all medical subspecialties.

- At four AHN hospitals, women experience personal nursing care and family-centered childbirth with obstetricians and midwives in our spacious birthing suites.
- Pregnant and postpartum patients with substance use disorder get help through Perinatal Hope, receiving counseling, medication-assisted treatment, and obstetric care, all at the same appointment.

World-renowned expertise

Though Allegheny Health Network (AHN) was established in 2013, its member hospitals share legacies of charitable care that date back more than 160 years. We provide health care delivery, medical education, and wellness services through an integrated health care delivery network that includes 13 hospitals (including four neighborhood hospitals), five Health + Wellness Pavilions, affiliated physician offices, ambulatory surgery and outpatient centers, a research institute, home- and community-based health services, and a group purchasing organization.

In 2020, AHN opened its fourth neighborhood hospital, AHN Harmar, and a new facility for cancer care, education, and research at Allegheny General Hospital. In fall 2021, we will welcome patients to our newest, full-service hospital in Wexford.

*AGH has the highest one-month and one-year survival rates for adult heart (single organ) transplant patients performed between 1/1/2017 and 6/30/2019 among all facilities performing such transplants in the 16 westernmost counties of Pennsylvania. Data provided by Scientific Registry of Transplant Recipients (SRTR). Information available at www.srtr.org.

Allegheny Health Network (AHN) complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability or sex in its health programs and services. In order to treat individuals in a nondiscriminatory manner, AHN provides free communication aids and language assistance services.
